

IN COLLABORAZIONE CON

SMART BUILDINGS AND DIGITALIZATION

Fiera Milano Rho, Friday 20 march 2020, 9.30 - 13.30

Gemini Room - Centro Congressi Stella Polare

Digitalization and ICT based technologies are changing a vast range of building disciplines, including HVAC. These technologies are underpinning smart building systems, which have taken building energy and non-energy-related performance to the next level through advanced digital intelligence.

International experts will present different aspects linked to the digitalization of our industry from the technical aspects of smart buildings, through user-centred smart building technologies till digital engineering for quality and performance monitoring, digitalization of HVAC products and effects of European legislation on smart buildings and digitalization.

REGISTRATIONS

Entrance to the Seminar is free.
On line registration within
March 19.

REGISTRATIONS ON SITE

The registration desk opens 30 minutes before the Seminar

SEMINAR PRESENTATIONS -

The presentations will be available online for free after the event on the website www.aicarr.org and www.rehva.eu

CONTACTS

AiCARR Secretariat
Gabriella Lichinchi
Tel. 02 67479270
info@aicarr.org
www.aicarr.org

The entrance ticket to the Exhibition is requested to attend the Seminar in Gemini Room, which hosts the event.

Simultaneous traslation will be provided

Training Credits have been required for the continuous training of Engineers and Periti Industriali. The assignment is subjected to the approval by the CNI and CNPI.

Gemini Room - Centro Congressi Stella Polare
March 20, 2020 - 9.30 –13.30

PROGRAMME

- 9.30 Participants Registration
- 9.45 **Welcome and opening**
Chaired by: *Juan Travesi Cabetas, REHVA Vice-President*
AiCARR Representative
- 10.00 **Smart buildings and digitalisation – Impact on building value**
Frank Hovorka, REHVA President
- 10.20 **Digitalization and smart buildings in the revised EPBD**
Anita Derjanecz, REHVA Managing Director
- 10.40 **The impact of digitalisation of the HVAC sector**
Juan Travesi Cabetas, REHVA Vice-President
- 11.00 **Digitalization and smart buildings: the role of energy data analytics**
Alfonso Capozzoli, Politecnico di Torino
- 11.20 **The impact of the revision of the EPBD on energy savings from the use of building automation and controls**
Simone Alessandri, European Building Automation and Controls Association (eu.bac), Bruxelles
- 11.40 **Coffee Break**
- 11.50 **Smart readiness indicator: updates and testing the methodology in real cases**
Andrei Litiu, REHVA Project Consultant
- 12.10 **Creating value with Smart Buildings**
Davor Stjelja, Granlund, Consultant Innovation and development
- 12.30 **Digital quality management for smart Buildings**
Stefan Plessner, Synavision GmbH, Founder and CEO
- 12.50 **Room systems as a service platform for smart buildings**
Risto Kosonen, Aalto University, Associate Professor
- 13.10 **Standardisation and interoperability of HVAC&R BIM products (TBC)**
Sandrine Marinhas, Managing Director, Prodbim by Eurovent
- 13.30 **Q&A and closing remarks**

Entrance to the Seminar is free. It is necessary to register not later than 15 March 2020 from the website:
