

Lisa Meline, P.E., LEED-AP, is the owner and principal engineer of Meline Engineering. She is a recognized authority on renewable energy systems, particularly geothermal heat pump systems.

She speaks regularly on the topic of sustainable energy systems at industry events and teaches in the Renewable Energy Certificate Program at the University of California-Davis Extension, the university's program for continuing and professional education.

Meline is the Standards Subcommittee Chair for ASHRAE Technical Committee 6.8 on Geothermal Heat Pump and Energy Recovery Applications, a co-chair of IGSHPA's Standards Committee, and serves as Special Expert on the IAPMO Uniform Solar Energy and Hydronics Technical Committee.

Meline is an ASME Fellow, a recipient of ASME's Dedicated Service Award, and a Certified Geoechange Designer by the Association of Energy Engineers. She has a BS and MS in mechanical engineering, both degrees from California State University.
