

## **Guideline 13-2007 -- Specifying Direct Digital Control Systems**

This guideline is intended to provide a designer of DDC systems with background information, recommendations of good practice, project considerations, and detailed discussion of options with respect to the design of a DDC system. Included is an example specification, presented as excerpted parts embedded throughout the document, and also available as a separate file in Microsoft Word format.

This guideline is under continuous maintenance, which is a process ASHRAE uses to keep guidelines current through the issuance of addenda, or revisions. Please make sure the guideline number and date of issue match your document.

When they are available, these addenda can be downloaded for free at the following page of the ASHRAE Web site:
